- GENISLAB Mariella Paciello – INFN Rome
- GENOVATE Antonella Liccardo - University of Naples
- STAGES Daniella Falcinelli - University of Milan and Giovanna Declich ASDO Rome
- TRIGGER Silvia Cervia – University of Pisa and Giovanna Declich ASDO Rome
- GENDERTIME – UNIPD team
- PLOTINO – Tullia Gallina Toschi – University of Bologna

# PANEL – open questions

- for open projects, which are the major resistances encountered and how have you planned to overcome them?
- which the main achievements?
- when projects will be closed, how can you think to manage the sustainability of achieved results?
- learned lesson?
- utility of the network and possible tools to plan and share

# Towards gender equality in Science

- Relevant changes for women in Science and Technology might take place starting from a **consciousness of gender**: the double membership in profession and gender of a women scientist has the potential to shape and disseminate such a consciousness
- The Institutions have to adopt **gender policies** for supporting women in their careers, in particular with measures regarding the work-life balance and, in general, promoting Women in Science and Technology

**The future is too important to be left to men**  
The Royal Institute of Technology in Stockholm – Campaign 2015
